

Boston Children's Hospital/Dana Farber Cancer Institute is offering a one-year Pediatric Stem Cell Transplant (SCT) and Cellular Therapies Fellowship for qualified pediatricians who have completed pediatric hematology/oncology fellowship training and who wish to pursue further training in cellular therapy and transplantation. This is a one-year position with a focus on clinical care and clinical/ translational research.

Candidates will join a large and vibrant transplant and cellular therapies group led by Dr. Leslie Kean that performs over 130 stem cell transplants and cellular therapy infusions annually. There is access to outstanding experienced SCT faculty with diverse interests and expertise, a sophisticated cell manufacturing facility and the resources of an adult and pediatric cancer center as well as a free-standing quaternary- care children's hospital.

## Program description

- Position openings: One per year
- Duration: One-year fellowship (non-accredited)
- Application deadline: December 1 (Annually)
- Fellowship start date: July (Annually)
- Fellowship Director: Leslie Lehmann MD ([leslie\\_lehmann@dfci.harvard.edu](mailto:leslie_lehmann@dfci.harvard.edu))

## Curriculum

Our curriculum offers a broad exposure to inpatient and outpatient SCT and cellular therapy care as well as a variety of research opportunities.

Fellows rotate through the following areas:

- SCT inpatient service (approximately 3 months)
- SCT outpatient clinic and new patient evaluation (approximately 3 months)
- CART outpatient clinic
- Apheresis and cell processing laboratory exposure

Other opportunities are available based on the interest.

Fellows have 6 months of research time and are expected to complete a scholarly research project during the fellowship.

## Eligibility

Eligible applicants must:

- Have completed three (3) years of pediatric hematology/oncology fellowship training

- Be board certified or eligible in general pediatrics
- Be board certified or eligible in pediatric hematology/oncology/BMT in the United States or Canada upon matriculation
- Be able to obtain a Massachusetts medical license

## How to apply

We seek candidates who embrace and reflect diversity and are an equal opportunity employer (EOE). Minorities, women, individuals with disabilities, protected veterans are encouraged to apply.

Once applications are reviewed, invited candidates will be asked to interview with the Fellowship Director and SCT Director and then with our Fellowship Advisory Committee.

Interested applicants should email additional questions and the following information to the program director and administrative lead at
